Final trained models · identical canonical-boundary passages · 128 positions / 32 targets
A · Same tokenizer #0771, same stress passages
Absolute BPB
Canonical inputs
Transferred inputs
ZeTT
Uniform pool
RL
B · The broader weak regime: 24 tokenizer settings
Transfer gap · BPB
C · Pretokenization regimes, 12 settings each
Median transfer gap · BPB
Regex
Line only
No regex
D · Does the stress regime amplify each model's gap?
All natural text
